

## ENTRECC

### UNLEASHING ENTREPRENEURSHIP POTENTIAL IN CCIS

Project No: 2024-1-BG01-KA210-VET-000256549

“  
*Digital Platform Testing Workshops  
Successfully Implemented in 4 Countries*  
  
*18 February 2026*  
”

We are excited to share, the successful implementation of the **Digital Platform Testing Workshops** across four European countries. These workshops brought together partners, learners, and CCI Professionals to explore, test, and improve the project's digital platform in real learning environments.

Between the partner countries, Digital Platform Testing Workshops were organised to ensure the platform responds to users' needs while promoting innovation, collaboration, and digital learning. Each session generated valuable feedback, strengthened international cooperation, and supported the improvement of the platform's functionality and accessibility.

The workshops were hosted by AIM (Bulgaria — Coordinator), PYLON ONE (Greece), NIKOLA KAREV (North Macedonia), and WKO (Austria). Through these activities, participants explored key features, shared insights, and contributed to shaping a more user-friendly and impactful digital environment.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the Human Resource Development Centre (HRDC). Neither the European Union nor the granting authority can be held responsible for them.

## DIGITAL PLATFORM TESTING WORKSHOPS

**18  
FEBRUARY  
2026**

By working together across borders, the partnership continues to strengthen digital innovation and create meaningful opportunities for practical, hands-on learning. The collaborative spirit of the consortium allows partners to exchange expertise, identify common challenges, and develop solutions that respond to diverse educational and technological needs across Europe.

The feedback gathered during these workshops represents a significant milestone in the platform's development journey. Insights from participants and trainers help refine usability, improve accessibility, and ensure that the final version will effectively support learners, educators, and stakeholders. This process not only enhances the platform's quality but also lays the foundation for a sustainable digital tool with long-term impact at European level.
